

# Global Health Curriculum

Graduates will be better prepared for careers in government, with international NGOs and health care agencies, industry, and academic institutions. The concentration is also for students who wish to work on global health issues in the U.S., particularly those affecting ethnic populations that retain strong cultural ties to their country of origin.

## ABOUT THE CURRICULUM

The Global Health Curriculum is designed for students pursuing an MPH or MS degree who seek an enhanced understanding of public health challenges and successes within a global health context. With passionate students, engaging and impactful global research opportunities, logistical and generous financial support, the curriculum prepares students for a variety of future careers.

## THE CURRICULUM CONSISTS OF:

- IPHS 409: Global Public Health Challenges
- IPHS 410: Global Public Health Successes
- 3 semester hours of approved Global Health Electives
- MPH: Global Health focused Applied Practice Experience
- MS: Global Health focused Thesis

To apply for the curriculum, students must submit the following as a single PDF to Keith Partyka ([kpartyka@uic.edu](mailto:kpartyka@uic.edu)), Academic Advisor of the Global Health Program:

1. Completed application form
2. Updated resume
3. Statement of interest (1-2 paragraphs)

**Fall Deadline: October 1**
